

Welcome to Northwestern Medicine!

Your health and everyone's safety is our highest priority. To help maintain a safe environment for everyone, we have taken extensive measures, including the following:

- **Universal masking.** Everyone is required to wear a mask while in our hospitals or ambulatory facilities. Masks are available for those entering our facilities.
- **Comprehensive cleaning.** Our Environmental Services teams continue to perform rigorous cleaning of our facilities and have increased the frequency of cleaning and disinfecting in high-touch areas. Hand sanitizer dispensers remain available throughout our facilities.
- **Physical distancing.** A distance of at least 6 feet from others must be maintained unless you are receiving direct patient care. We have modified seating arrangements in waiting rooms, food courts and other common areas to reinforce this practice. Elevator capacity also is limited.

Our entire Northwestern Medicine team is focused on ensuring you feel safe and supported during this time.
